## Get the Extra Harvest Out of Every Acre!

The farmer who sows ordinary "country-run" seeds automatically devotes a good part of his acreage to noxious weeds and other pests. Furthermore, he has no assurance of the germinating properties of these seeds, and is very apt to get a weak, sickly, unprofitable stand.

Keystone Seeds are:

- [1] selected from strains best adapted to your section by expert seedsmen,
- [2] cleaned of weed seeds, pests and foreign matter by cleaning machines that are marvels in seed-preparing efficiency,
- [3] scientifically tested for purity and germination in a modern laboratory,

and they produce a strong, healthy stand that yields from fifteen to twenty per cent more profit.
